CLASSIC BASEOIL...

A Basis Characterized by High Quality and Universality

This CLASSIC OIL series product combines versatility in application with maximum environmental and consumer protection and occupational safety. Featuring a solid content of 100 vp, a very mild residual VOC and its renewable ingredients made of native oils, CLASSIC BASEOIL ranks among the most environmentally friendly oil-technique products.

CLASSIC BASEOIL was designed for easy, uniform application as well as intensive deep penetration. This makes it the perfect basis for oil. On this basis you can:

- a) work in one layer
- b) do the second layer as the top one in oil products (CLASSIC 100PROOIL, CLASSIC HARDOIL)
- c) build up multiple-layer coats with well-proven waterbased finish products

The detailed system configurations and their characteristics are described in more detail overleaf of this booklet. All exact system configurations of oil technique are listed in the module-system table on page 3 of the booklet CLASSIC OIL MODULE SYSTEM.

In all cases we have the typical and much-loved oil look, i.e. grain enhancement and natural wood character. Because of its easy and even spreadability it is the most straightforward coloration technique with most intensive color effects made by Berger-Seidle. To shorten the drying time and to qualitatively improve the job at hand there is available, in case of need, the reactive agent CLASSIC PLUS. This is admixed and stirred in at the ratio 10:1.

Colored Floors Achievable ...

Thanks to the factory-colored variant of CLASSIC BASEOIL a decent up to heavy surface coloration is feasible. This means coloring and oiling in one go. The way of application allows for evenly colored areas. There are 33 standard color shades available (see color chart at right side). Beyond that, other special shades are available too. Please additionally read our current technical data sheet.

CLASSIC BASEOIL COLOR...

The Numerous Standard Shades
